

Potential Outbreak Protocols

Esperanza Elementary School will transition students to virtual learning if two students in a class test positive for COVID19 (Coronavirus) for all students who were exposed to the virus, one classroom at a time. A student is considered exposed if they were in close contact (within six feet) with a student who tested positive for ten minutes or more without a mask.

Esperanza Elementary School will transition 100% to virtual learning if five percent of the student body tests positive for the virus (27 students).
